[Richard Muller's Temperature Project Aptly Termed The 'Berkeley Scam' -- ramuller@lbl.gov](#) -- Muller's team 'are completely unbiased and open minded, though they have already determined (ahead of their neutral study) that global warming is the most serious problem in the world'

[Climatologist Roger Pielke Sr. Slams Richard Muller's 'contradictory statements' -- ramuller@lbl.gov](#) -- 'All Muller's study has accomplished so far is to confirm that NCDC, GISS and CRU honestly used the raw observed data as the starting point for their analyses. This is not a surprising result...The uncertainties and systematic biases remain unexplored so far by Richard Muller...Muller and his colleagues have not yet examined these concerns, yet chose to report on his very preliminary results at a House Hearing'

[He can't get basic temperature data correct?! 'Muller's graph appears to be incorrect' -- Richard Muller Claims 1C Warming Since 1977 -- 'But HadCRUT shows about half of that'](#)

[Muller Exposed: 'I was disheartened by the testimony of Richard Muller...he has totally destroyed any credibility he might have had with me' -- ramuller@lbl.gov](#) -- Muller is 'a man driven by a very serious agenda, a man who doesn't check his work and who pays insufficient attention to facts in testimony'

['GOP asked Richard Muller the wrong questions. Warming is miniscule, and the little warming we have seen isn't primarily due to CO2'](#)

[What Richard Muller Isn't Saying: 'Most of the warming in his graph occurred after PDO shift in 1977' -- 'The rate of warming is below low end of projections. In other words, a don't care'](#)

[Meteorologist D'Aleo: Berkeley's Muller goes to Washington and another misleading statement by NOAA CCSP author Thorne](#)

[Prof. Richard A. Muller's testimony: 'According to IPCC report \(2007\), the human component became apparent only after 1957, and it amounts to 'most' of the 0.7 degree rise since then' -- 'I believe that some of the most worrisome \(temperature\) biases are less of a problem than I had previously thought'](#)

Other Scientists Testifying at Congressional Hearing:

[Warmist Prof. Kerry A. Emanuel warns of future wars over global warming! 'Uncertainties are reflected in climate projections, which at present range from benign to catastrophic' --](#)

Emanuel: 'I am appalled at the energetic campaign of disinformation being waged in the climate arena...the U.S. helped the world confront such global problems as fascism and communism. As a citizen, I hope that my country will once again rise to the challenge and assume leadership in this arena too'

[Skeptical Testimony: UN IPCC's Dr. John Christy: 'UN IPCC Lead Author working with a small cohort of scientists, misrepresented the temp record of the past 1000 years' --](#) Christy: 'UN IPCC Lead Author's (L.A.'s) have virtually total control over the material and behave in ways that can prevent full disclosure of the information that contradicts their own pet findings and which has serious implications for policy in the sections they author...I saw a process in which L.A.s were transformed from serving as Brokers of science to Gatekeepers of a preferred point of view'

[Skeptical Testimony: Forecasting Expert Prof. J. Scott Armstrong audited IPCC's temperature forecasting procedures and found they 'violated 81% of the 89 relevant forecasting principles' --](#) The warmists 'argument for predictive validity is based on their claim that nearly all scientists agree with forecasts...errors for IPCC model long-term forecasts were 12.6 times larger than 'no change' model...'We have identified 26 historical alarmist movements. None of forecasts for alarm proved correct. In the 25 alarms that called for gov't intervention, gov't imposed regulations in 23. None of 23 interventions was effective and harm was caused by 20 of them'
