

### ***Global Warming Cure Found – Dire IPCC Reports***

It seems we have found the cure for global warming. Have the IPCC issue a dire report about global warming every other month. In February when they issued the Summary for Policy Makers, it was the coldest February since 1979 in many parts of the central and east. Now with their April release, Mother Nature is showing “its not nice to fool Mother Nature” by slamming us with winter in April. So far April is tracking as the coldest in 113 years.

The four day period from April 6th to April 9th brought 156 record lows to a large part of the nation east of the Rockies. 13 were ALL TIME April lows. Snow fell as far south as Dallas, Texas and Mobile, Alabama and a heavy snowstorm cancelled an entire four game baseball series in Cleveland.

# Record	Day	City
1	Fri	Aberdeen SD 6F
2	Fri	Rapid City SD 6F
3	Fri	North Platte NE 13F
4	Fri	Springfield MO 22F
