

## **Climate Change Projections for the Australian Capital Territory**

**R. Suppiah and P. H. Whetton**

Consultancy for ACT Electricity and Water

CSIRO Atmospheric Research, Private Bag No1, Aspendale VIC 3195

### **Important Disclaimer:**

CSIRO Land and Water advises that the information contained in this publication comprises general statements based on scientific research. The reader is advised and needs to be aware that such information may be incomplete or unable to be used in any specific situation. No reliance or actions must therefore be made on that information without seeking prior expert professional, scientific and technical advice. To the extent permitted by law, CSIRO Land and Water (including its employees and consultants) excludes all liability to any person for any consequences, including but not limited to all losses, damages, costs, expenses and any other compensation, arising directly or indirectly from using this publication (in part or in whole) and any information or material contained in it.

Climate Change Impacts, Risk and the Benefits of Mitigation

Jones, R.N. and Preston, B.L. December, 2006, A report for the Energy Futures Forum

### **Important Notice:**

The results and analyses contained in this Report are based on a number of technical, circumstantial or otherwise specified assumptions and parameters. The user must make its own assessment of the suitability for its use of the information or material contained in or generated from the Report. To the extent permitted by law, CSIRO excludes all liability to any party for expenses, losses, damages and costs arising directly or indirectly from using this Report.

### **Climate Change in New South Wales**

K. Hennessy, C. Page, K. McInnes, R. Jones, J. Bathols,

D. Collins\* and D. Jones\* Climate Impact Group, CSIRO Atmospheric Research

\* National Climate Centre, Australian Government Bureau of Meteorology

Consultancy report for the New South Wales Greenhouse Office, CSIRO 2004

### **Important Disclaimer**

This report relates to climate change scenarios based on computer modelling. Models involve simplifications of the real physical processes that are not fully understood. Accordingly, no responsibility will be accepted by CSIRO or the New South Wales government for the accuracy of projections in this report or actions on reliance of this report.

---

### **Climate Change in the Northern Territory**

K. Hennessy, C. Page J. Bathols, K. McInnes, B. Pittock, R. Suppiah and K. Walsh\*

Climate Impact Group, CSIRO Atmospheric Research, \* School of Earth Sciences, Melbourne

University, Consultancy report for the Northern Territory. Department of Infrastructure, Planning and Environment, CSIRO 2004

### **Important Disclaimer**

This report relates to climate change scenarios based on computer modelling. Models involve simplifications of the real physical processes that are not fully understood. Accordingly, no responsibility will be accepted by CSIRO or the Northern Territory government for the accuracy of projections in this report or actions on reliance of this report.

---

## **Climate Change in Queensland under Enhanced Greenhouse Conditions Final Report, 2002**

Report on research undertaken for Queensland Departments of State development, Main Roads, Health, Transport, Mines and Energy, Treasury, Public Works, Primary Industries, and Natural Resources,  
Kevin Walsh, Wenju Cai, Kevin Hennessy, Roger Jones,  
Kathy McInnes, Kim Nguyen, Cher Page and Peter Whetton

### **Important Disclaimer**

This report relates to climate change scenarios based on computer modelling. Models involve simplifications of the real physical processes that are not fully understood. Accordingly, no responsibility will be accepted by CSIRO or the QLD government for the accuracy of forecasts or predictions inferred from this report or for any person's interpretations, deductions, conclusions or actions in reliance on this report.

## **Climate change under enhanced greenhouse conditions in South Australia**

An updated report on: *Assessment of climate change, impacts and risk management strategies relevant to South Australia*

R. Suppiah, B. Preston, P.H. Whetton, K. L. McInnes, R.N. Jones, I. Macadam, J. Bathols and D. Kirono, Climate Impacts and Risk Group, CSIRO Marine and Atmospheric Research June 2006

### **Important Notice**

Disclaimer: CSIRO makes no representations or warranties regarding merchantability, fitness for purpose or otherwise with respect to the report. Any person relying on the report does so entirely at his or her own risk. CSIRO and all persons associated with it exclude all liability (including liability for negligence) in relation to any opinion, advice or information contained in this report, including, without limitation, any liability which is consequential on the use of such opinion, advice or information to the full extent of the law, including, without limitation, consequences arising as a result of action or inaction taken by that person or any third parties pursuant to reliance on the report. Where liability cannot be lawfully excluded, liability is limited, at CSIRO's election, to the re-supply of the report or payment of the cost of re-supply of the report.
